

Portfolio Manager Commentary and Performance

Market Update

In March, the Fund returned -0.17%, and YTD -1.09%

The main driver during the first two weeks of the month was the expectation about how hawkish the new Fed Chairman Jerome Powell would be, however after his speech and new dots plot, the pressure over treasury decrease, allowing the ten years treasury rate decrease about 15 bps. However, the rate fear gives place to uncertainty around the trade war and his scope in global trade.

The performance comes mainly from Brazil (-10 bps) and Mexico (-2 bps). By Sector, Consumer non Cyclical contributed -12 bps. By Credit Rating, all the bucket contributed negatively, were BB bucket contributed with -12 bps. Finally, Minerva, Marfrig contributed with -5 bps and -3 bps respectively.

Fundamentals in Latam continue to be strong, growth is accelerating across the Region, cash flow are increasing as liability management reduce interest payment, and most of the capex had been already done in past years.

Performance

Detailed Risk Metrics*

Yield to Maturity	5.95%
Duration (years)	4.8
Volatility (annual)	3.4%
Sharpe Ratio (annual)	0.9
Beta	0.60
Alpha	1.23%
Tracking Error (annual)	2.69%
Information Ratio	-0.04

(1) Performance is net of fees. SICAV Series I performance is shown as of January 1, 2015; prior to that, the performance shown is that of the Chilean-domiciled Series D, which has an identical strategy. Fees can be up to 1.15% on an annual basis.
